

## CBS must think you're not smart enough to connect the dots.

This map shows the 50+ cities where millions of viewers are currently blacked out from their favorite shows. It's all because CBS and broadcasters like it are demanding higher fees. And worse, CBS is now blacking out its Internet content to some viewers, too.

They're making you watch static—so why not create a little of your own? Go to [AmericanTelevisionAlliance.org](http://AmericanTelevisionAlliance.org), click on “Act Now,” and tell your Senators and Representatives to update America's TV carriage rules. The American people give the broadcasters our airwaves for free, and they respond by blacking us out? We're not that dumb.

A VOICE FOR THE TV VIEWER
